

Save today for their tomorrow.

Speaker 1: "It took me a long time to make a decision about the Florida Prepaid College. Education is very important to me, um I have a Bachelors degree and it was tough for me to get it. So I'm thinking about my daughters' future and how I can help and getting that easier than I had it. It took me along time because you know, I wanted a new car, a new T.V. but its' affordable and it takes sacrifice but you know, I think it'll pay off."

Speaker 2: "I definitely think it's a good idea to pursue this avenue, simply because there's tax benefits, there's guarantees by the State of Florida, so our money's always safe. Um, the um, what was the other thing?"

Speaker 1: " The tuition price stays the same when you enter the program, so that's another benefit. You don't have to worry about higher tuition prices when they do start college."

Speaker 2: "The prices are locked in, so we're good, we're set for the future."
