

Save today for their tomorrow.

Speaker 1: "Hello we are Sarah and George. These are our daughters Harper and Granger, they were born February 2008. We decided to invest in the Florida Prepaid Program long before they even born. We had the paperwork all filled out before they even came home. We knew that it as important to us because we wanted them to have the opportunities that we did. We both went to Florida public universities and had great experiences. It was easy for me to decide on this program because my grandmother actually did the program for me, so I never had to worry about tuition or any of those issues and was able to go to a four-year university. Also, we were worried about the rising tuition prices and also cost of living and how we were going to be able to afford to send two and we thought you know, we just got to go ahead and do it. We signed up, the program was so easy, we went online and filled out the paperwork, it wasn't rocket science to figure out which program to choose and we decided to do the four year program for them and we're excited to provide them with the opportunity to provide them with a great education.

We did look at all the options and the differential of the dorm and decided to first, just start with the four year plan knowing we can add all these things and we do plan to that in the future but right now with budgeting like we all have to do, we're starting out with the four year plan.

In trying to figure out which plan to use, we heard about all the 529's and this that and the other and it was kind of overwhelming but since I had done the program myself, I knew that it worked I knew that is easy. Just sign up, they deduct it from my monthly account, my bank account and I don't have to think about it, I don't have to write a check and um, I know that it's done and when the time comes we can send them away."
