Prepaid Testimonial #9:

Speaker 1: "Gives me a little piece of mind that that's taken care of and it's easier to make small payments and all that to wait 'til the end to have a big loan to take out."

Speaker 2: "Yeah I remember that when we started we actually didn't know what to do but we did know we had some kind of plans for the to go to school but this was perfect because it kind of just fell in place. Ah, it was kind of like the military when we were selling something and everyone was reading about it on the internet and we were paying this money a month but we could see it 'til 18 years alter, and it kind of bugged you a little bit but seeing it now happen and seeing the girls grow up it seems to be beneficial and you could always think about plan B too. "

Speaker 1: " So, we're thankful."

Speaker 2: " Anyway, when we first started, I was kind of researching you know, for them, not so much for us, but to see them you know, be successful as they grew up and to have something even though at that time, we wasn't strap for money but the money wasn't great. So the money wasn't great, but we knew that they would need something for the future, so that kind of just brought us to where we saw them being involved and keeping them involved more, at least an education to be secure, through the Florida Prepaid Plan. So what do you think about that?"

Speaker 1: "I think basically it's a win/ win situation. Their college will be paid for and if they are blessed with a scholarship, than there's always plan B.

Speaker 2: " Well they all would want a car too you know, maybe we'll want a car. And that's pretty much what we'll hold on to, it's having that small amounts of money going into that secure fund that they can use for their education is fantastic. And they can even use it at another state if they want to. Because, they can, if they decide to go to California or Georgia, the Bulldogs or something, they can use that cash money to pay for that school there."
